Why is it worth growing black chokeberry?

Scientific research has shown that substances present in processed chokeberry products:

Black chokeberry is the healthiest fruit in the world..
In one small berry it combines the benefits of red wine and green tea.

Why you should buy rooted cuttings from selection stool beds

Vegetatively propagated plants guarantee very high yields, and their growth habit facilitates mechanical harvesting. Seedlings produced from seed do not guarantee high yields because their vigorous growth does not allow to mechanize the harvest.

Why this nursery should be trusted

Piotr EGGERT (MSc) is a pioneer of chokeberry cultivation in Poland. He has over 35 years experience in breeding chokeberry. For 35 years he has been trusted by thousands of satisfied customers.

1. The nursery sells the best selected cuttings and plants. Their selection has been carried out continually since 1975. Nobody in Europe can boast of working longer on the cultivation and selection of chokeberry plants.
2. The nursery sells chokeberry plants of the cultivars 'Nero' and 'Nero-Eggert' (a clone of 'Nero' selected in the nursery), which faithfully reproduce their characteristics to guarantee high yields and facilitate mechanical harvesting.
3. In the nursery you can get expert advice on starting and running a plantation. You can also obtain a book on growing chokeberry by Piotr Eggert, published in Polish, German and English.
4. The nursery has experience in selling plants on the European market, as well as in the U.S. and Canada.
5. Plants are always delivered to the customer in perfect condition, ensuring that 100% of them will take root on the new plantation.

Is it difficult to grow chokeberry?

BLACK CHOKEBERRY
is ideally suited for the garden,
allotment and large plantations

Chokeberry fruits are of interest to:

- Fruit processing plants (juices, nectars, jams, wines, teas, candied fruits, etc.)
- Food industry in Poland and many European countries (e.g. food dyes)
- Pharmaceutical industry (dietary supplements, vitamins, etc.)
- Cosmetics industry (components of many cosmetic preparations)
- People who care about their health (making home preserves and liqueurs)
